

# Trihalomethane (THM) Removal Results with proven spray aeration systems from IXOM Watercare

Spray Aeration Systems can be designed for virtually all reservoirs and any desired trihalomethane reduction result. The below data are from systems designed for 40-50% THM removal with removal rates shown based on actual total THM entering and leaving the reservoirs.

Additional reduction also occurred in downstream.

## About IXOM

IXOM combines innovative water quality solutions with top notch manufacturing and nationwide field service capabilities to create trusted, full circle support our Customers depend on. We design and manufacture many trusted brands including GridBee®, SolarBee®, MIEX®, and ResidualHQ© for use across the water quality spectrum. IXOM has thousands of installations and is an industry-leader solving water quality problems across the United States, Canada and the world.
